

In 1965, a group of university professors and social activists created University Research Co., LLC (URC) to address the social challenges of the 1960s. From its beginning, URC combined the idealism of the era and the rigor of academic research with the pragmatism necessary to achieve results. Today, URC is well established as an influential leader in international development and has grown into a global company of some 1,000 staff dedicated to improving the quality of health care, social services, and education. Together with its not-for-profit affiliate, Center for Human Services (CHS), URC has managed projects in over 80 countries, including the United States.
